Summary

Software Engineer with 3+ years of professional experience building scalable backend systems and full-stack web applications. Strong expertise in Laravel, with solid experience in React, Next.js, and NestJS. Worked on healthcare automation platforms, SaaS marketplaces, LMS systems, and tourism platforms in production. Focused on clean architecture, performance, and real-world business requirements.

Professional Experience

Full Stack Engineer (Laravel & Vue.js) Mar 2026 – Present

Zimam Company — Makkah, Saudi Arabia (Remote)

- Contributed to the development of **Intithal**, a compliance and evaluation platform for assessing pilgrim residences and camps prepared for the 1447 Hajj season.
- Built full-stack features using Laravel (backend) and Vue.js (frontend).

Full Stack Software Engineer (Laravel & React) Sep 2025 – Present

Progma Tech — Remote

- Developed and maintained production systems across healthcare automation, SaaS services, and tourism platforms.
- Built backend systems and administrative dashboards for **CBOT**, a hospital UVC robot management platform.
- Implemented booking, payment, and workflow features for **Misk Sens**, a service marketplace SaaS.
- Contributed to a multilingual (EN / AR) React-based admin dashboard for a tourism SaaS platform.

Full Stack Software Developer (Laravel & Next.js) Oct 2024 – Sep 2025

Progma Tech — Remote

- Contributed to **Taj Al-Quran**, a large-scale Learning Management System (LMS).
- Implemented user management, course structures, evaluations, and payment integrations.
- Developed the **Progma.tech** website with a custom admin CMS and SEO-ready architecture.

Software Developer Intern Jul 2023 – Sep 2023

NextRay AI Detection & Response Inc — Remote

- Assisted in frontend development using React.
- Built backend services using Spring Boot and REST APIs.

- Developed a real-time chat feature using WebSocket.

Projects

CBOT – Autonomous UVC Disinfection Platform (Healthcare)

- Backend platform for managing autonomous UVC disinfection robots in hospital environments.
- Implemented role-based access control, task tracking, and monitoring dashboards for hospital operations.

Bishola.com – C2C Car Marketplace

- Built a scalable car marketplace using NestJS and Next.js.
- Implemented advanced search, filtering, and authentication features.
- Fully responsible for deployment and production setup using Docker, Nginx, shell scripts, and GitHub Actions CI/CD pipelines.

Misk Sens – SaaS Booking Platform

- Service booking and marketplace platform with integrated online payments.
- Implemented multi-booking (cart) support and booking lifecycle workflows.

Taj Al-Quran – Learning Management System (Backend)

- Backend development for a large-scale LMS platform built entirely with Laravel.
- Implemented user management, course structures, evaluation systems, and payment integrations.

Progma Official Website

- Developed the company's official website using Laravel (backend) and Next.js (frontend).
- Built a custom admin CMS for dynamic content management, SEO settings, and site configuration.
